יְהוָה
Yahweh

We need to look up to Mt. Sinai to the Elohim of Israel, YHWH is a consuming fire, and by His Ruach/Spirit He teaches us that there is a 13th month listed in the Scriptures.

WE WILL LOOK AT SOME BACKGROUND FIRST

In Genesis 1:14 YHWH two witness in the heavens the sun and moon is a solar lunar calendar and today there is 29/30 days per month.

The moon orbit around the earth takes 29 days 12 hours and 44 minutes per month, or 29.5 days.

A solar lunar calendar has 354 days in a year, and approximately every 3 years we have to add a 30 day month, making a 384 day year, in order to stay in the spring growing seasons.

The Roman calendar (solar-only) has 365 day in a year, the Roman calendar is 11 longer than a solar /lunar calendar.

In the days of Noah the months all contained 30 days. The water began to flood the earth on the 2 month 17th day Gen. 7:11 it began to recede after 150 days in the 7 month 17 day Gen. 8:3-4 after 5 months. 150 days divided by 5 Mo. = 30 days each Mo. Therefore in Noah day the months had 30 day.

Note: YHWH moved the shadow backwards on the sundial 10 degrees, therefore changing the month from 30 day each month in Hez-e-ki-ah day, to 29 and 30 day each month from then, until now. Isaiah 38:1-9 / 2nd Kings 20:1-21 / 2nd Chronicles 32:24-33.

Now for our subject is there is a 13th month that can be proven from Scripture? Yes there is, we will look in the inspired book of the prophet Ezekiel.

1. Ezekiel 1:1-2 states that Yahweh spoke to him in the 4th month on the 5th day of the month in the fifth year of King Je-hoi'a-chin's.

2. Ezekiel 3:16 “And it came to pass at the end of **seven days** that the word of YHWH came to me, saying...” **This is when the time starts by adding in the 7 days we have the 4th month and the 12th day** when the 430 days were to start next verse.

4. Ezekiel 4:1-11 **Yahweh instructs him to lay on his side 390 days then to lay on the other side 40 days. A total of 430 days**

5. Ezekiel 8:1 **he is in his house on the 5th day of the 6th month of the 6th year, 1 year 1 month and 23 days later, Ezekiel is seated before the Elders in the 5th day of the 6th month of the 6th year.**

Now let's count 12th day of the 4th month of the 5th yr. to the 5th day of the 6th month of the 6th year is 13 months and 23 days or 1 year 1 mo 23 days.

We will count using the Roman calendar first then we will use the Lunar Solar calendars

Is it possible for Ezekiel to have fulfilled the 430 day on a Roman calendar that has 365 days in a year + the 30 days and the +23 days, it being the 6th month, and have been in his house before the Elders on the 5th day of the 6th month of the 6th year? We will count the Roman calendar days first.

Let's add this up $365 + 30 + 23$ days = 418 total days; this would be short at least 12 days of the 430 days. The Roman calendar will not work.

Now to see if the Lunar-Solar calendar will work with a 13th month added about every 3 years, in this 430 days time period.

A Lunar-Solar calendar has 354 days in a year + this year had a 13th month in it so we add + 30 days=384, so this year had 384 days in the year.

Now this is the 5th day of the 6th month of the 6th year, so we add the $384 + 30$ days +23 days = 437 or 436 if one of the extra month only has 29 days in it.

We can see that Ezekiel could have fulfilled the 430 days that YHWH command him, and was seated before the elders in Ezekiel 8:1 with 6 or 7 days extra,

This shows that the previous year had a 13th month in it in Ezekiel; this is proof of a 13th month calendar from the Scripture.

I believe there is much more on this subject I pray that YHWH will add to our hearts the understanding that we need. I'm still trying to understand about the time it took him to prepare all of his food and water, plus his own personal bathing and washing. Working on not done
